Are subsections and structure of the manuscript appropriate?</p>	<p>Yes, the manuscript appears to be important for the scientific community, particularly for researchers and professionals working in the field of aquatic ecology and environmental science. It addresses the assessment of organic pollution in a specific river ecosystem using benthic macroinvertebrates as indicators, which is a commonly used method in freshwater quality monitoring. Understanding the impact of organic pollution on aquatic ecosystems is crucial for environmental management and conservation efforts. Additionally, the study provides insights into the effectiveness of using benthic macroinvertebrates for water quality assessment, which can inform future research and monitoring initiatives.</p> <p>Title can be modified "Benthic Macroinvertebrates as Indicators of Organic Pollution in Upstream Batena River, Central Ethiopia"</p> <p>Yes</p> <p>Yes</p>	

<p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent?
