

Name:	UTTAR PRADESH JOURNAL OF ZOOLOGY
Manuscript Number:	Ms_UPJOZ_3146
Title of the Manuscript:	Veterinary Pathology Diseases and Disorders in Domestic and Wild Animals
Type of the Article	

General guideline:

This journal believes that no manuscript should be rejected only on the basis of 'lack of Novelty', provided the manuscript is sufficiently robust and technically sound. Too often a journal's decision to publish a paper is dominated by what the Editor/reviewer think is interesting and will gain greater readership - both of which are subjective judgments and lead to decisions which are frustrating and delay the publication. This journal will rigorously peer-review your submissions and publish all papers that are judged to be technically sound.

1: Review Comments

	Reviewer's comment	Author's feedback
<p><u>Compulsory</u> REVISION comments</p> <p>1. Is the manuscript important for scientific community?</p> <p>(Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable?</p> <p>(If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional</u></p>	<p>1.Yes, the manuscript is important for the scientific community as it provides a comprehensive overview of the significance of veterinary pathology in understanding and managing diseases in both domestic and wild animals. It highlights the crucial role of veterinary pathologists in diagnosing and treating diseases, as well as the broader implications for human health, public health, and pharmaceutical research.</p> <p>2.Title of this article may be change if author accept it. "Advancements and Challenges in Veterinary Pathology: Implications for Animal and Human Health"</p> <p>3.It could benefit from a more explicit mention of the One Health approach, which emphasizes the interconnectedness of human, animal, and environmental health. Additionally, while the abstract discusses the study of various pathologies, including infectious diseases, toxicological conditions, and neoplastic diseases, it could further emphasize the role of veterinary pathology in addressing zoonotic diseases and its implications for public health. Furthermore, the abstract could include a brief mention of the collaboration between veterinary pathologists and ecologists in monitoring and managing diseases in natural habitats, contributing to efforts in biodiversity preservation. These additions would further enhance the comprehensiveness of the abstract.</p> <p>4.Yes, the manuscript's subsections and structure appear to be appropriate, as they effectively organize the content and facilitate</p>	<p>Okay</p>

<u>suggestions/comments)</u>	<p>the understanding of the significance of veterinary pathology in managing diseases in domestic and wild animals.</p> <p>5. Overall, the manuscript appears to be scientifically accurate and comprehensive in its coverage of veterinary pathology.</p> <p>6.The references provided in the manuscript are diverse and cover a wide range of topics related to veterinary pathology. However, it would be beneficial to include more recent references to ensure the manuscript reflects the latest developments in the field. Additionally, including references that specifically address the role of veterinary pathology in managing diseases in both domestic and wild animals would further enhance the comprehensiveness of the manuscript. Some potential additional references could include recent studies on zoonotic diseases, the impact of environmental factors on animal health, and advancements in diagnostic technologies for veterinary pathology. By incorporating more recent and relevant references, the manuscript can strengthen its scientific foundation and provide readers with the most up-to-date information in the field of veterinary pathology.</p> <p>The article could include a brief mention of the collaboration between veterinary pathologists and ecologists in monitoring and managing diseases in natural habitats, contributing to efforts in biodiversity preservation. These additions would further enhance the comprehensiveness of the article.</p>	
-------------------------------------	--	--

Minor REVISION comments	<p>1.The manuscript contains several topographical mistakes, such as incorrect page numbers and formatting issues in the references. For example, reference contains a formatting error with the page numbers, and reference has inconsistent formatting with the volume and page numbers. These mistakes can affect the readability and accuracy of the references. It is important to ensure that the references are consistently formatted and accurately presented to maintain the integrity of the manuscript according to the journal guideline to authors.</p> <p>2. The manuscript could include a brief mention of the collaboration between veterinary pathologists and ecologists in monitoring and managing diseases in natural habitats, contributing to efforts in biodiversity preservation.</p> <p>3. The overall manuscript is missing proper citations of references in the paragraphs. I don't know whether this article is for a book chapter or a review paper.</p>	
Optional comments	<p>Specifically, conclusion could address the continued evolution of the field, the integration of new technologies, and the need for collaborative, multidisciplinary approaches. Additionally, the conclusion could emphasize the proactive and adaptive stance required to address challenges such as emerging diseases and ethical considerations in treatment and research. Furthermore, highlighting the role of veterinary pathology in public policy and regulatory frameworks, as well as its importance in advancing our understanding of animal diseases, would further enhance the conclusion.</p>	

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
